

Norraskogsägarna, 10 MW Hot Water, 2008

Bioenergy Plant

The facility supplied for Northern Forest in Savar provides hot water for wood kilns. Fuel is sourced from local stock consisting of mostly bark with moisture content 35-55%. The plant is fitted with a flue gas condenser for future expansion to feed a district heating network.

Power: 10 MW hot water
Client: Norra skogsägarna
(Northern Forest Owners)
Location: Savar, Sweden
Business: Sawmill
Year built: 2008
