

Skara energi, 8 MW hot water, 2006

Bioenergy Plant

The Bioenergy Plant supplied at Skara Energy, was installed as part of an expansion to the district heating network. The facility is located at the northern end of the network. The facility is equipped with a flue gas condenser to fully exploit the energy generated from the biofuel which contains 35-50% moisture content.

Power: Biofuel boiler 8 MW hot water
Customer: Skara Energy
Location: Skara, Uddetorp, Sweden
Activities: District Heating
Year built: 2006
